

The Airport Commercial Revenue Study 2008/09

- ✓ Commercial income data for the airport industry
- ✓ Benchmark analysis for some 40 airports
- ✓ Historical trend analysis of airport commercial performance
- ✓ Compare your airports' performance by key business area

Published every two years since 1998, The Airport Commercial Revenue Study has become an indispensable tool which benchmarks relative commercial performance across a range of airports by a variety of indicators

Includes duty free, speciality retail, food & beverage and foreign exchange.

The indicators include gross sales per square metre, airport retail revenue per passenger and square metres of retail per thousand passengers.

Sections dedicated to the world's top travel retailers (specifically duty free based) and a round-up of the latest commercial revenue performances across a range of international airports.

AVAILABLE LATE MAY 2009
